

## **Senior Air Quality Engineer**

We are looking for a sharp Senior Air Quality Engineer to join our team in Northern California at our Berkeley, CA office. We are a growing, highly respected environmental air quality consulting firm based out of Southern California. We work on a wide variety of environmental air quality permitting and compliance projects, across a diverse range of California industries and locations. We offer a friendly, team-oriented work environment.

### **Position Summary:**

The Senior Engineer performs professional engineering work of considerable difficulty supervising and/or executing the permitting and compliance function in regards to Title V, RECLAIM, Emissions Reporting, Green House Gas, and Air Monitoring on behalf of our clients. Analyzing permit-related technical and regulatory issues, and communicating those analyses within the department, with applicants, with other agencies and with the public at large; performs other duties as required or assigned.

This is an experienced senior level position working under general supervision. Positions at this level are assigned to perform the more complex and sensitive duties in the occupational field. The employee in this position may be assigned to train other employees and/or monitor work produced by other employees.

### ***The candidate qualifications we are looking for include:***

#### **Experience:**

- 10 - 20 years of work experience in the air quality industry in a senior or leadership position (preferably in a consulting environment);
- Extensive experience with permitting and compliance for Title V, RECLAIM, PSD, New Source Review, Annual Emissions Reporting, Air Quality Assessments including Data Analysis and Emission Inventories;
- Ability to lead project teams and technical staff to project completion within project scope, budget and schedule and ensure quality work product and deliverables;
- Proven track record of successful regulatory work in dealing with the BAAQMD, SJVAPCD, SCAQMD, EPA, CARB and other similar agencies;
- Ability to manage successful relationships with clients, staff, and regulators through effective communication and expertise by fostering a collaborative environment without losing focus of quality;
- Experience in conflict resolution and crisis management;
- Highly motivated to continue working in the air quality environmental field and expand their knowledge and experience;

**Skills:**

- Excellent verbal and written communication;
- Project management experience;
- Advanced computer applications and database management.
- Analysis, interpretation, and application of rules and regulations towards practical solutions;
- Leadership capabilities and experience;
- Strong Microsoft 365, Sharepoint, Excel, Word, Powerpoint, Access abilities;

**Education Requirements:**

- B.S. degree in Chemical Engineering, Environmental Engineering, Mechanical Engineering, Chemistry, or other relevant degrees from an accredited college;
- M.S. preferred but not necessary
- P.E. certification preferred.
