

Sr. Air Quality Engineer/Scientist - Mobile Source Experience

Join Yorke Engineering, LLC, an Environmental Consulting leader in California that implements Environmental Engineering and Compliance solutions for our clients throughout California. Our mission is to solve environmental compliance problems for industrial and governmental/infrastructure facilities. We are a growing and dynamic organization of highly respected professionals. Yorke Engineering, LLC has assisted over 1,400 client organizations with their Air Quality and Environmental Compliance, Engineering, and Permitting needs. Our philosophy is to efficiently help government and industrial customers with the complex array of environmental laws and regulations. From simple permits to complex agency negotiations, from small companies to the largest of California's organizations, Yorke successfully solves our clients' Air Quality and Environmental challenges. Our team has over 1,000 years of combined environmental experience and consists of engineers and scientists that specialize in Air Quality, Waste, Water, CEQA, Safety, and Industrial Hygiene.

We are looking for a sharp **Sr. Air Quality Engineer/Scientist (Environmental Compliance)** to join our team in Southern CA. This is a full-time position at 40 hours per week from one of our Southern CA offices (San Juan Capistrano or Diamond Bar offices) during our normal business hours. We offer competitive salaries, a full benefits package including Paid Time Off, Holidays, Full Medical/Dental/Vision, along with a 401k program with a generous company match.

Position Summary:

The Senior Air Quality Engineer/Scientist (Environmental Compliance) is responsible for performing professional engineering work by leading and executing compliance evaluations and planning related to Air Quality Regulations. The candidate will work closely with clients to evaluate compliance statuses, analyze technical and regulatory issues, and communicate the findings with various entities within each client's organization and to government agencies. This position requires effective communication, decision-making, and time management skills. Other duties may be assigned as required.

This is a senior-level position, and the employee will be responsible for performing complex and time-sensitive duties within the occupational field. They may also be assigned to train and mentor other employees and monitor work produced by them.

Qualifications:

- 10-20+ years of work experience in the Air Quality and/or Environmental industry in an engineering role, preferably in a consulting environment
- Experience in the environmental services industry, focusing on leading Air Quality services, particularly mobile source reporting, planning, and compliance and/or fleet management (on- and off-road)
- Ability to manage and lead active team members on project teams towards project completion within project scope, budget, and schedule, and ensure quality work product and deliverables

- Ability to manage successful relationships with clients, staff, and regulators through effective communication and expertise by fostering a collaborative environment without losing focus of quality
- Proven track record of successful regulatory work in dealing with the CARB, AQMD, EPA, and/or similar regulatory agencies
- Prepare reports and submissions in a timely manner
- Experience with handling highly technical data and interpreting technical data
- Highly motivated to continue working in the Air Quality environmental field and expand their knowledge and experience
- CA Regulatory/Compliance experience is required

Job Requirements:

- B.S or M.S. degree in Chemical Engineering, Environmental Engineering, Mechanical Engineering, or other relevant technical degrees from an accredited college (minimum GPA of 3.0)
- Rule expertise related to mobile source emissions compliance and reporting
- Ability to work collaboratively in a team, handle several projects at once, prioritize work, and work efficiently
- Desire to train and share technical expertise in subject matter expertise with clients and team members
- Excellent oral and written communication skills
- Experience in conflict resolution and crisis management
- Track record of successful analysis, interpretation, and application of rules and regulations towards practical solutions
