

Project Manager – Fleet Modernization

Join Yorke Engineering, LLC, an Environmental Consulting leader in California that implements Environmental Engineering and Compliance solutions for our clients throughout California. Our mission is to solve environmental compliance problems for industrial and governmental/infrastructure facilities. We are a growing and dynamic organization of highly respected professionals. Yorke Engineering, LLC has assisted over 1,400 client organizations with their Air Quality and Environmental Compliance, Engineering, and Permitting needs. Our philosophy is to efficiently help government and industrial customers with the complex array of environmental laws and regulations. From simple permits to complex agency negotiations, from small companies to the largest of California's organizations, Yorke successfully solves our clients' Air Quality and Environmental challenges. Our team has over 1,000 years of combined environmental experience and consists of engineers and scientists that specialize in Air Quality, Waste, Water, CEQA, Safety, and Industrial Hygiene.

We are looking for a skilled Project Manager to join our team in Southern CA with the growing demand for Fleet Modernization projects for a wide array of industries/clientele. This is a full-time position at 40 hours per week from one of our Southern CA offices (San Juan Capistrano, Diamond Bar, or Long Beach) during our normal business hours. We offer competitive salaries, a full benefits package including Paid Time Off, Holidays, Full Medical/Dental/Vision, along with a 401k program with a generous company match.

Position Summary:

We are looking to expand our mobile source compliance team with mid-level talent. The Project Manager will work closely with the Yorke team and clients to assess inventories, evaluate fleet compliance statuses, analyze technical and regulatory issues, fleet reporting, and communicate the findings with various entities within each client's organization and to government agencies. This position requires effective communication, decision-making, and time management skills. Other duties may be assigned as required.

This person will be responsible for performing complex and time-sensitive duties within the occupational field. They may also be assigned to train and mentor other employees and monitor work produced by them.

Qualifications:

- 5+ years of experience in Air Quality/Environmental project management, ideally inclusive of fleet compliance experience
- Experience in environmental services, particularly mobile source reporting, compliance, planning, and/or fleet management of on-road and/or off-road vehicle fleets
- Ability to manage successful relationships with clients, staff, and regulators through effective communication and expertise by fostering a collaborative environment without losing focus on quality
- Proven track record of successful regulatory work in dealing with the CARB, AQMD, and/or similar regulatory agencies

- Ensure reports and submissions are submitted in a timely manner
- Experience with handling highly technical data and interpreting technical data
- Highly motivated to continue working in the fleet modernization compliance and expand their knowledge and experience
- CA Regulatory/Compliance experience is required

Job Requirements:

- Minimum of a Bachelor's degree in Engineering, Urban Planning, Project Management, Public Policy/Administration, or other relevant technical degrees from an accredited college (minimum GPA of 3.0)
- Rule expertise related to mobile source compliance and reporting
- Ability to work collaboratively in a team, handle several projects at once, prioritize work, and work efficiently
- Desire to share technical expertise in subject matter expertise with clients and team members
- Excellent oral and written communication skills
- Experience in conflict resolution and crisis management
- Track record of successful analysis, interpretation, and application of rules and regulations towards practical solutions

Optional Qualifications

- Ideal candidate will be familiar with any array of CARB fleet regulations (T&B, ACF, PSIP, Clean Truck Check (HDIM) Program, ORD, LSI, PERP, etc) and know how to effectively navigate between applicability and exemptions for multiple regulations to correctly identify the appropriate requirements that apply.
- Experience with funding/incentive programs such as Carl Moyer, VW Mitigation Funds, HVIP, CORE, Prop 1B Goods Movement, Federal Programs, etc
- Experience with Port-specific regulations and requirements (CHE, CHC, Drayage, etc)
