

***Air Quality Engineer / Scientist (Env. Permitting and Compliance Specialist)***

Join Yorke Engineering, LLC, an Environmental Consulting leader in California that implements Environmental Engineering and Compliance solutions for our clients throughout California. Our mission is to solve environmental compliance problems for industrial and governmental/infrastructure facilities. We are a growing and dynamic organization of highly respected professionals. Yorke Engineering, LLC has assisted over 1,400 client organizations with their Air Quality and Environmental Compliance, Engineering, and Permitting needs. Our philosophy is to efficiently help government and industrial customers with the complex array of environmental laws and regulations. From simple permits to complex agency negotiations, from small companies to the largest of California's organizations, Yorke successfully solves our clients' Air Quality and Environmental challenges. Our team has over 1,000 years of combined environmental experience and consists of engineers and scientists that specialize in Air Quality, Waste, Water, CEQA, Safety, and Industrial Hygiene.

We are looking for a sharp **Air Quality Engineer / Scientist (*Environmental Permitting and Compliance Specialist*)** to join our team in **any of our Southern CA offices (Diamond Bar, Long Beach, Los Angeles, San Juan Capistrano, San Diego, Ventura, or Riverside)** during our normal business hours. We offer competitive salaries, a full benefits package including Paid Time Off, Holidays, Full Medical/Dental/Vision, along with a 401k program with a generous company match.

***Position Summary:***

The **Air Quality Engineer / Scientist (*Environmental Permitting and Compliance Specialist*)** performs professional engineering work, executing the compliance and permitting functions in relation to Air Quality Regulations and Compliance. This candidate will be reviewing processes and equipment, analyzing permit-related technical and regulatory issues, and communicating those analyses within Yorke, the client organization, with government agencies and with the public at large. The work is challenging, broad in scope, and variable from project to project. The position involves effective communication, decision-making, and time management. The candidate performs other duties as required or assigned.

***The candidate qualifications we are seeking include:***

- 3-10 years of work experience in the Air Quality and/or Environmental industry in an engineering role (preferably in a consulting environment);
- Experience as an active team member in the environmental services industry as a consultant focusing on:
  - Process and equipment review;
  - Air quality permitting under SCAQMD, and other Air Districts, including Title V permitting;
  - RECLAIM implementation and reporting;
  - Annual Emissions Reporting;

- Air Dispersion Modeling;
  - Air Quality Assessments including Data Analysis and Emission Inventories;
  - General Air Quality Compliance for facilities in CA, including problem solving.
- Ability to be an active team member on project teams towards project completion within project scope, budget and schedule and ensure quality work product and deliverables;
- Ability to work with clients, staff, and regulators through effective communication and expertise by fostering a collaborative environment without losing focus of quality;
- Proven track record or desire to engage in successful regulatory work in dealing with the SCAQMD, EPA, CARB and/or other similar regulatory agencies;
- Experience or desire to work on-site at client facilities;
- Prepare reports and submissions in timely manner;
- Experience with handling highly technical data and technical data interpretation;
- Highly motivated to continue working in Air Quality environmental field and expand their knowledge and experience;
- **CA Regulatory/Compliance experience is required.**

**Job Requirements:**

- B.S or M.S. degree in Chemical Engineering, Environmental Engineering, or Mechanical Engineering, or other relevant technical degrees from an accredited college (minimum GPA of 3.0);
- Ability to work collaboratively in a team fashion, handle several projects at once, prioritize work, and work efficiently;
- Desire to learn or developing technical expertise in environmental rules and regulations;
- Excellent oral and written communications skills;
- Experience in conflict resolution and crisis management;
- Track record of successful analysis, interpretation, and application of rules and regulations towards practical solutions;
- Ability to think critically and develop solutions;
- Software Knowledge:
  - Strong Microsoft Excel, Word, Outlook, and Powerpoint skills (required);
  - Microsoft 365 Applications, including Sharepoint (a plus)
- EIT, CPP or P.E. (a plus).
