

Sr. Air Quality Engineer/Scientist - Mobile Source Experience

Join Yorke Engineering, LLC, an Environmental Consulting leader in California that implements Environmental Engineering and Compliance solutions for our clients throughout California. Our mission is to solve environmental compliance problems for industrial and governmental/infrastructure facilities. We are a growing and dynamic organization of highly respected professionals. Yorke Engineering, LLC has assisted over 1,400 client organizations with their Air Quality and Environmental Compliance, Engineering, and Permitting needs. Our philosophy is to efficiently help government and industrial customers with the complex array of environmental laws and regulations. From simple permits to complex agency negotiations, from small companies to the largest of California's organizations, Yorke successfully solves our clients' Air Quality and Environmental challenges. Our team has over 1,000 years of combined environmental experience and consists of engineers and scientists that specialize in Air Quality, Waste, Water, CEQA, Safety, and Industrial Hygiene.

We are looking for a sharp **Sr. Air Quality Engineer/Scientist (Environmental Permitting and Compliance)** to join our team in Southern CA. This is a full-time position at 40 hours per week from one of our Southern CA offices (San Juan Capistrano, Long Beach, Diamond Bar, Riverside, San Diego) during our normal business hours. We offer competitive salaries, a full benefits package including Paid Time Off, Holidays, Full Medical/Dental/Vision, along with a 401k program with a generous company match.

Position Summary:

The **Sr. Air Quality Engineer/Scientist (Environmental Permitting and Compliance)** performs professional engineering work, leading and executing the compliance and permitting functions in relation to Air Quality Regulations and Compliance. This candidate will be reviewing processes and equipment, analyzing permit-related technical and regulatory issues, and communicating those analyses within Yorke, the client organization, with government agencies and with the public at large. The work is challenging, broad in scope, and variable from project to project. The position involves effective communication, decision-making, and time management. The candidate performs other duties as required or assigned.

This is a Senior level position. Positions at this level are assigned to perform the more complex and sensitive duties in the occupational field. The employee in this position may be assigned to train and mentor other employees and/or monitor work produced by other employees.

The candidate's experience and qualifications we are seeking include:

- 10-20+ years of work experience in the Air Quality and/or Environmental industry in an engineering role (preferably in a consulting environment);
- Experience in the environmental services industry focusing on leading Air Quality services, particularly mobile source reporting, permitting, and compliance and/or fleet management (on- and off-road)
- Ability to manage and lead active team members on project teams towards project completion within project scope, budget and schedule and ensure quality work product and deliverables;

- Ability to manage successful relationships with clients, staff, and regulators through effective communication and expertise by fostering a collaborative environment without losing focus of quality;
- Proven track record or desire to engage in successful regulatory work in dealing with the CARB, AQMD, EPA, CARB and/or similar regulatory agencies;
- Experience working on-site at client facilities;
- Prepare reports and submissions in timely manner;
- Experience with handling highly technical data and technical data interpretation;
- Highly motivated to continue working in Air Quality environmental field and expand their knowledge and experience;
- **CA Regulatory/Compliance experience is required.**

Job Requirements:

- B.S or M.S. degree in Chemical Engineering, Environmental Engineering, or Mechanical Engineering, or other relevant technical degrees from an accredited college (minimum GPA of 3.0);
- Rule expertise, as related to mobile source emissions compliance and reporting
- Ability to work collaboratively in a team fashion, handle several projects at once, prioritize work, and work efficiently;
- Desire to train and share technical expertise in subject matter expertise with clients and team members;
- Excellent oral and written communications skills;
- Experience in conflict resolution and crisis management;
- Track record of successful analysis, interpretation, and application of rules and regulations towards practical solutions.
