Industrial Hygiene and Safety Specialist

Join Yorke Engineering, LLC, an Environmental Consulting leader in California that implements Environmental Engineering and Compliance solutions for our clients throughout California. Our mission is to solve environmental compliance problems for industrial and governmental/infrastructure facilities. We are a growing and dynamic organization of highly respected professionals. Yorke Engineering, LLC has assisted over 2,000 client organizations with their Air Quality and Environmental Compliance, Engineering, and Permitting needs. Our philosophy is to efficiently help government and industrial customers with the complex array of environmental laws and regulations. From simple permits to complex agency negotiations, from small companies to the largest of California's organizations, Yorke successfully solves our clients' Air Quality and Environmental challenges. Our team has over 1,000 years of combined environmental experience and consists of engineers and scientists that specialize in Air Quality, Waste, Water, CEQA, Safety, and Industrial Hygiene.

We are looking for a sharp **Industrial Hygiene and Safety Specialist** to join our team in our Southern CA offices (Los Angeles, Long Beach, Diamond Bar, Riverside, San Juan Capistrano, or San Diego). This is a full-time position at 40 hours per week during our normal business hours. We offer competitive salaries, a full benefits package including Paid Time Off, Holidays, Full Medical/Dental/Vision, along with a 401k program with a generous company match.

We offer a friendly, high performance, team-oriented work environment where professionals can grow amongst their respective peers. This is a fantastic opportunity for someone looking to expand their professional development in a challenging yet rewarding environment.

Position Summary:

The **Industrial Hygiene and Safety Specialist** reviews, evaluates, and analyzes work environments and is responsible for designing policies and procedures to ensure adherence to regulations on safety, health, and the environment. They will also design programs to prevent disease or injury to workers and damage to the environment. This candidate will be analyzing regulatory required compliance and technical issues, and communicating those analyses with clients, peers, and with regulatory agencies; performs other duties as required or assigned.

This is an experienced level position working under general supervision.

The candidate qualifications we are looking for include:

- 4-10 years of experience as an Industrial Hygienist, Certified Safety Professional, or Environmental Health and Safety Professional, preferably in a consulting environment;
- Analyzes and ensures regulatory compliance as they relate to the health, safety, and environmental policies for our clients, this includes local, state and federal level regulations;

- Ability to perform safety, environmental, or occupational health inspections for compliance with established policies to identify potential new hazards;
- Familiarity with various monitoring and sampling methods, procedures, and techniques used in collecting and testing related to air, dust, odor, and noise monitoring;
- Experience in developing and supporting an efficient Industrial Hygiene and Safety Management System on behalf of clients' sites;
- Experience with different facets of IH and EH&S services such as:
  - Job Hazard Analyses;
  - Personal Protective Equipment;
  - OSHA Regulations;
  - ISO 140001;
  - Industrial Hygiene Monitoring and Reporting;
  - Ergonomics Evaluations and Reporting;
  - Experience in Lockout/Tagout (LOTO);
  - Illness and Injury Prevention Plans (IIPP);
  - Training on new regulations;
- Extensive experience with process, manufacturing, and/or other industrial facilities;
- Ability to manage multiple clients at any given time without losing focus of quality;
- Experience in dealing with regulatory agencies.

Job Requirements:

- B.S. degree or higher in Public Health and Safety, Occupational Health and Safety, Environmental Science, Chemistry or any other relevant degree from an accredited college/university (minimum GPA of 3.0);
- Well developed technical expertise in IH and Health & Safety rules and regulations;
- Capable of working independently in the field;
- Field experience and ability to travel to client sites;
- Excellent oral and written communications skills;
- Experience in conflict resolution and crisis management;
- Advanced computer applications (Excel, Word, Powerpoint);
- Ability to work successfully in team orientated environments;
- CSP and/or CIH certification are highly desired.

Salary: Commensurate with Experience and Negotiable
